NEWTECH

Fiber fusion splicer

Model No.: NTPL-FS60E

4.3 inch	8	18	6
HD touch screen	8Pcs arc fusion times	Rapid heating	Motors for accurate positioning
3	5200 mAh	300	
Three-in-one clamp	High battery life	Magnification	

6 Motor drive

Equipped with six motors and precision micro-step guides, it has two positioning and dissolution loss than 4 motors. Faster dissolution time and higher work efficiency.

Copper core motor

Microstep guide

180° flippable Screen

High-resolution 12×180° flippable touch screen GUI operation interface design, convenient and easy to operate

Intelligent GUI interface

The screen is concise and clear, and the operation is smooth. Intelligent detection and prompt of welding faults.

"Welding data can be exported and can save 10000 welding data and 1000 images"

18 Seconds Heating

Supports automatic and manual heating modes, supports pre-heating, with a heating time of 18 seconds. Large capacity storage, can save up to tens of thousands of data

8 seconds instant

7 fusion modes / slow loss

Red light source

Optical power

Built in VFL+OPM

Built-in red light source and optical power, supports 4 seven-segment digital tube display. Large capacity storage, can save up to tens of thousands of data

Red light source

Optical power

Three-in-one clamp

Three-in-one universal clamp for quick work, low-loss, bare cables, etc. Fully automatic splicing of optical fibers, fast fusion, stable and low

Can complete 200 fusion and heating cycles

5200mAh high battery life

Pop-up battery compartment for single battery charging Supports automatic shutdown and power-saving modes

Push button pop-up

DETAIL DISPLAY

01. Equipped with LED lighting for convenient operation in dark environments

02. With status indicator light and heating indicator light

03. Supports external charging, USB upgrade, and fusion data export when turned on

04. With rental mode and multiple language settings (customizable languages)

05. Equipped with dedicated toolbox and fiber optic cutting knife

Product Parameters

Heating time	10000times	Heating mode	Automatic, manual
Battery capacity	5200mAh(can recharge)	Standby time	4.5-5 hours
Screen size	4.3 (1.8)	Heating temperature	70-700℃
Heating time	AC:100-240V、50/60Hz	Heating time	DC:13.5V/4A
Heating time	150*105*152mm	Heating time	4.5KG(150*105*152mm)
Heating time	1.1MB(including battery)	Heating time	4.7KG
Heating time	Temperature:0℃-35℃(Humidity:<95% RH without condensation) Storage temperature:-20℃-45℃ Humidity: < 95% Battery temperature:-20℃-45℃		

Technical Parameters

Applicable fiber	SMF(G.652),NMF(G.651),DSF(G.653),NZDSF(G.655)
Applicable fiber	Cladding: Φ0.150 μ M, Sod-cover layer: 0.1-3mm
Applicable fiber	G.652B/SMF(0.22)/G.654B/DSF/NZDSF/MDF
Applicable fiber	Fiber core, cladding
Applicable fiber	Six motor automatic focusing
Applicable fiber	Arcing Manual
Applicable fiber	8 seconds (typical SMF value)
Applicable fiber	0.36-2.256
Applicable fiber	Capacitive 5.6 inch touch LCD screen
Applicable fiber	with 2675/720 SKY synchronization)
Applicable fiber	1000 welding data and 1000 images
Applicable fiber	10%
Applicable fiber	90%
Applicable fiber	150mm/20mm/40mm/50mm/60mm
Applicable fiber	Range of fibre: 10 × ultrasonic(1 mm) (80-102mm),Uncertainty:<0.5%
Applicable fiber	P-10648
Applicable fiber	High graphical user interface

Product configuration

Host

Toolbox

Electrodes(Optional)

Cutting knife

Stripper(Optional)

Three-in-one fiber clamp

Power adapter

Brush
